Williams Lake

Desous Trail Network

Desous is a 1/2 hour drive west of the City and is home to some truly amazing free riding. Decents of 3500ft from the top of Desous Mountain all the way to the Fraser River make this home to some of the biggest lines this side of Golden. This area is intended for advanced riders, as there is no real easy way down. If you're looking for big lines, this is where it's at

Prime and Endless

TRAIL STYLE: Downhill GRADE: Advanced

This the middle line on the backside and is extremely esthetic. It starts with a moderate section through some open fir forests and some really nice single track. You'll come to a few tight corners, then begin to descend a steep gully section down to English Road. An advanced line for the free-riders amongst us.

Soo Long

TRAIL STYLE: Downhill GRADE: Advanced

This is a classic backside line that is a favourite among locals. It is by far the most moderate line that can be ridden by any intermediate rider. It starts at the top of the road where you'll drop in to a nice single track then up a few short climbs. After the first 800m of the trail, you'll drop into the main DH. This is where fast, flowy and tight single track was born. You'll have no trouble navigating this trail as it is the only line. Eventually you'll cross a large open field and onto the flat section. The last gully is one of the best in the Cariboo. Finish at English Road.

God Speed

TRAIL STYLE: Downhill

GRADE: Advanced

This trail starts a little ways down from the old fire tower site and is the steepest and most advanced line on the backside. Tight single track and gullies are the name of the game with this trail. Guaranteed to raise the hair on your neck as you keep er' pinned to English Road.
